Company	Result	Upgrades	Downgrades	Buy/Hold/Sell	Prev Target	New Target	Brokers
AIZ - Air New Zealand	IN LINE	0	0	0/1/0	0.00	0.00	1
Macquarie considers the FY22 loss reported by Air New Zealan guidance but did highlight that domestic bookings are back at 10 levels. Overall, the company should achieve capacity of 75-80% macro headwinds, nevertheless Macquarie increases earnings for	00% pre-covid	ovid levels fro l levels in FY2	m April and int	ernational is trad	ing at 65-'	70% pre-c	covid
AKE - Allkem	IN LINE	0	1	4/0/1	15.20	15.74	5
Judging by a split of beat, meets and misses, broker forecasts diproduction guidance for Mt Cattlin by -12% due to ongoing impguidance at Olaroz. The outlook is dependent on the delivery on Credit Suisse believes Allkem's recent share price improvement	acts from Stage 2 O	covid and a ti laroz and the	ght WA labour completion of S	market, which ou al de Vida consti	itweighs a ruction. St	15% lift tick-in-the	for pricing e-brine

from the June half, and downgrades to Sell.

CAJ - Capitol Health	MISS	0	0	1/0/0	0.43	0.42	1
----------------------	------	---	---	-------	------	------	---

Capitol Health's operating earnings were slightly below Credit Suisse' estimates on the impact of pandemic-related effects of lockdowns and elective surgery restrictions. The broker moderates its expectations for the speed of Capitol Health's recovery for revenue and margins and lowers FY23 estimates. But management appears to have produced a credible result, the broker asserts, with the announcement of the acquisition of FMIG

overshadowing operating difficulties.						
CHC - Charter Hall	BEAT 0	0	3/2/0	14.67	15.03	5

Charter Hall Group's result beat almost all forecasts due to higher than expected performance fees. But with those big fees booked, FY23 guidance is lower, albeit still better than expected. Management is of the view that quality assets are less at risk for any meaningful valuation declines, partially because rental growth should offset any capitalisation rate softness. The development pipeline will help offset a slowing in transaction activity due to rising interest rates and their uncertain impacts upon asset values. Property revaluations contributed 40% of FY22 funds under management growth, but the pace slowed in the second half.

CCX - City Chic Colle	ective		IN LINE	0	0	3/2/0	2.79	2.52	5

City Chic Collective reported in line with forecasts. The market is currently very sensitive to inventory build-ups and as this is the case with City Chic, increasing debt on the balance sheet, the response was swift. Early FY23 sales are in line with FY21 but are slowing down, and a slowing economy will impact on consumer demand. Retail price increases have been instigated to mitigate the risk of margin compression. A significant opportunity is provided by the US plus-size market, despite a volatile start to the new year in the region.

11 7 1	* · · · · ·							
CBL - Control Bionics	]	IN LINE	0	0	1/0/0	0.89	0.85	1

Morgans makes only minor forecast changes following pre-released FY22 results for Control Bionics, and retains its Speculative Buy rating. After appointing local distributors, management expects FY23 sales growth in Asia. The broker believes covid delays are largely over and the sales pipeline

is ready to be converted.							
DTC - Damstra Holdings	IN LINE	0	0	0/1/0	0.22	0.22	1

Damstra Holdings' result was pre-guided. For Morgan Stanley, most attention will be focused on the outlook, specifically the growth versus cash-burn trade-off. FY23 guidance metrics appear to be in line with the broker's forecasts. But the second half gross margin fell to 66.7% versus 73.4% in the

APE - Eagers Automotive	IN LINE	0	0	5/1/0	13.78	14.30	6
Eagers Automotive reported earnings in line with recent guid disruptions, but despite headwinds, strong margins were retain which should provide for up to a year of protection against and term rather than long-term trend given the correlation of car	ined.The high n economic sl	light for most lowdown, and	brokers is the exupports Buy ra	xtent to which that the state of the state o	he order bo	ook has gr	own,
EXP - Experience Co	MISS	0	0	1/0/0	0.44	0.42	1
Experience Co's net loss was more than Ord Minnett expected labour, weather, fuel and other cost pressures, on top of the a moderate or reverse in the coming years as international capa inflation.	bsence of inb	ound visitors.	The broker expe	ects the bulk of	these press	ures to eit	her
FLT - Flight Centre Travel	IN LINE	1	0	0/4/1	16.50	16.97	5
Flight Centre's result was in line with July guidance. Having momentum into the new year. The company is anticipating it early to provide FY23 guidance as the industry is still experientilisation and airfares, the value proposition of travel agents price fall, Citi upgrades to Hold.	can return lei encing volatil	isure total tran ity as it recove	saction value to ers. warns uncertainty over government funding continues, and there is a risk in proposed higher wages before the Fair Work Commission. **BEAT** EVT - Event Hospitality & Entertainment 1/0/0 17.89 19.11 Event Hospitality & Entertainment's result was ahead of Ord Minnett's expectations amid improvements made during the pandemic. Management has signalled that while it is on track to return to pre-pandemic earnings, the timing may be pushed out beyond FY23 because of higher energy and other input costs, as well as the absence of international visitors in the hotels business. Still, Ord Minnett remains positive on the stock given the cost and revenue synergies that have been implemented. IN LINE EVN - Evolution Mining 2/4/02.77 2.72 6 Evolution Mining reported in line with expectations. Delivery risk in the short term is low given recent re-basing of expectations. FY23 is expected to be a peak capex year with growth at Cowal Underground and Red Lake. Management believes the balance sheet is in good shape with enough liquidity to fund its committed growth, but it can defer some growth if necessary. With six growth projects and gearing at 27%, the balance sheet is not considered an issue by Morgans (Buy) either, despite questions raised in the aftermath of results by some market participants. A study is to be released for the extension of Ernest Henry in the third quarter of FY23. IN LINE FCL - Fineos Corp 1/0/0 Fineos Corp's FY22 result met guidance and slightly beat Macquarie. Management has guided to stronger revenue growth in FY23, citing a solid pipeline of cross-sell and up-sell opportunities from existing customers. Macquarie lifts revenue forecasts accordingly. The broker notes there is little sign of a revival in new customers, but expects new-customer acquisition should kick in eventually. FBU - Fletcher Building 4/0/0 7.00 4 7.50 Fletcher Building posted an in-line result albeit a slight beat on guidance. Pricing power in both Australia and New Zealand was evident in the second half given the marked input cost inflation across the industry. Citi is optimistic because the business is cycling the covid impacts of FY22 and residential may deliver 300-400 more in unit sales to offset a fall in prices. Credit Suisse, however, expects FY23 growth to be flat as home buyers' spirits are expected to settle. Note the RBNZ has now raised rates in quick succession to 3.00%. FDV - Frontier Digital Ventures 1/0/01.41 1.32 Morgans makes only nominal changes to forecasts for Frontier Digital Ventures following its first results, which were slightly adrift of expectations. The broker highlights ongoing solid growth for both portfolio revenue and earnings, and notes the key goal of becoming operating cash flow breakeven was achieved in the period. GUD - G.U.D. Holdings **MISS** 0 0 3/2/011.93 5 11.52 The resilience of GUD Holdings' underling Auto business again shone through in the FY22 result, with second half organic Auto revenue growing comfortably above effective price increases, but disappointment came through Newly acquired AutoPacific Group. The former indicates continued volume growth despite cycling strong double-digit growth comparables in the prior year, and pricing has helped offset escalating costs. Unfortunately, newly acquired AutoPacific Group proved a drag, suffering from constrained new vehicle supplies, but the June quarter is considered the bottom with earnings expected to improve over FY23. **GEM** - G8 Education **BEAT** 0 1/1/0 1.18 2 UBS (Buy) suggests G8 Education delivered a solid result in a challenging environment, with revenue and earnings beating the broker's estimates by 5% and 6% respectively. UBS notes occupancy recovery is progressing well, and estimates G8 Education could get back to pre-covid levels by December, which could add \$3m upside to earnings forecasts. Labour remains a key challenge, with the industry arguing for skilled teachers to be an immigration priority. Macquarie (Hold) calls the earnings result in-line. GDF - Garda Property 1/0/0 Morgans suggests FY22 results for Garda Property demonstrated leasing successes in the REIT's active development pipeline. While the pipeline can be funded from existing facilities, management intends to sell two office asset in Melbourne to further bolster the balance sheet. FY23 earnings and dividend guidance are in-line with the broker s expectations. The Add rating is unchanged and the target falls due to the analyst s increased interest cost forecast. **BEAT** GMA - Genworth Mortgage Insurance Australia Genworth Mortgage Insurance Australia's June-half pleased Macquarie and management has sharply upgraded FY guidance. The broker does highlight there are plenty of headwinds, including a forecast -15% fall in house prices and rising unemployment. Earnings forecasts rise 9% for 2022 to reflect lower cancellations and 2% in FY23 to reflect improved investment incomes. Macquarie retains Sell. GMG - Goodman Group IN LINE 4/2/0 22.11 22.74 6 Goodman Group's result met expectations, with funds management outperforming and development commencements underpinning 34% growth in FY22 earnings, as well as asset value and rental growth. FY23 guidance over 11% growth is below expectation but brokers assume this is conservative, and note Goodman has a track record of guiding conservatively, followed by upgrades. The development pipeline is solid and while the portfolio is under-rented, gearing is good, with 72% of debt hedge for the next few years. Brokers are setting their own forecasts above guidance. **BEAT** GPT - GPT Group GPT Group reported first half funds from operations well ahead of forecasts due to higher retail net operating income, fewer rental abatements and a lower land tax rebate than a year ago. FY guidance has been upgraded to the high end of the range on strength in retail and growth in industrial, while office remains uncertain. Management addressed concerns over debt costs, providing an updated hedging strategy, but for most the prospect of

KLS - Kelsian Group	MISS	0	0	3/0/0	8.86	8.14	3
UBS found Kelsian Group's second half result solid in the face of were flat on the previous half. Ord Minnett reports a profit miss							

costs. The Tourism & Marine division was most impacted as omicron arrived during the peak domestic summer season. While headwinds are expected to ease, prior earnings estimates for the division will likely fall short. The Bus division is spared from cost pressures due to the nature of contracts. IN LINE 0 2 0/1/1 3.30 3.41 KGN - Kogan.com Kogan's pre-announced result met consensus forecasts. The highlight was falling fixed costs and warehouse expenses as inventory wound down. But UBS (Sell) casts a wary eye to top line-led operating deleverage, should consumer spending slow further as suggested by June-half trading. Credit Suisse notes selling costs moderated in the second half and price increases for Kogan First should provide additional support in FY23. As the stock has underperformed in the wake of the result and the cash position is better, the latter broker upgrades to Hold. LFS - Latitude Group MISS 0/1/01.30 1.30 1 Latitude Group's first half underlying results were weaker than Macquarie expected. Moreover, the headline was underpinned by provision releases and the broker believes this is premature. As the revenue environment remains challenging, amid potential consumer stress driven by rising rates, the broker is cautious about the prospects for the company. **BEAT** 5 LLC - Lendlease Group 4/1/0 It was a beat from Lendlease on the FY22 result although the dividend fell a little short. Management provided no guidance as per usual but segment guidance did offer some upside earnings potential for FY23, although varied broker responses suggests a range of prior forecasts. Macquarie (Buy) had expected FY23 earnings to disappoint the market. The broker views this as the last transition year before earnings return to target and, more importantly, the FY22 result increased line of sight into FY24-FY25 and beyond. An earnings recovery remains a story of FY24 and beyond, but Ord Minnett upgrades to Buy. 360 - Life360 IN LINE 0 1/0/0 5.50 6.80 1 Life360's FY22 June half result appears to have satisfied Morgan Stanley, hardware proving a miss, subscriptions outpacing and cash burn as expected. Management has lowered FY22 revenue guidance but the broker expects cost discipline, price rises and lower commissions suggest the company will provide a beat on recurring revenue and cash burn. **BEAT** LAU - Lindsay Australia 0 1/0/0 0.52 0.62 Lindsay Australia's underlying earnings exceeded Ord Minnett's expectations by 25%. Return on equity rose to 19.5%. The outperformance was underpinned by rising utilisation across road and rail-based transport. Conditions in the horticulture industry also provided a supportive backdrop. Ord Minnett assesses barriers to entry in Lindsay Australia's market are significant and the long-term growth strategy underpins a "bright" outlook. IN LINE 4/1/0 TLC - Lottery Corp 0 5 The Lottery Corp reported largely in line with forecasts, but given it was only spun off recently it's all a bit messy depending how brokers compare the numbers. Lotteries has started softly with poor jackpot activity to date with volumes down -21%. The Lotteries business supports more than 85% of earnings and delivered a record result during FY22, including 38% digital penetration. No guidance was provided and no dividend was declared, as expected. Despite some volatility from jackpot activity, The Lottery Corp offers attractive cash generation with low capital intensity, Macquarie (Buy) notes. MGH - Maas Group IN LINE 0 0 2/0/05.40 5.75 2 Maas Group's FY22 result was in line with Macquarie's estimate, with the company posting progress across all core segments and delivering top-end of guidance. Morgans has returned from restriction. Management has guided to FY23 earnings growth of 44-60%, ex acquisitions-pending, thanks to project wins in its Civil Construction & Hire division, 360-400 residential settlements, construction material volumes, maturation of the commercial property portfolio and a forecast improvement in the Manufacturing segment's operating environment. The balance sheet is solid following the recent equity raising. MAH - Macmahon IN LINE 0.20 Macquarie notes Macmahon has delivered solid financial and cash flow results in its full year report, with revenue and earnings up 26% and 11% year-on-year respectively, and both within 3% of the broker's forecasts. A margin decrease to 5.9% from 7.1% was attributed to higher operating costs, but the broker notes guidance for the coming year implies margin recovery, with revenue earnings guidance implying margins will increase to 6.6-7.4%. MFG - Magellan Financial Magellan Financial's result missed most forecasts, reflecting lower management fee margins, lower associate income as Barrenjoey retreated into a June-half loss, and a higher tax rate due to reduced offshore income. UBS (Sell) sees a risk to revenues and some 35% of earnings, due to the retail base fees which remain too high relative to the market place. UBS also notes the lack in change of strategic direction from the new CEO is unlikely to reverse fund outflows. Morgan Stanley (Sell) suggests the strong balance sheet provides new management with options to invest in growth and add teams, but a turnaround will take time and with the stock trading above peers. **BEAT** MPL - Medibank Private 0 0 3.76 7 5/2/0 3.58 Medibank Private's result either met or beat forecasts. Based on management commentary, which was generally upbeat, brokers expect a continuation of the favourable claims environment. UBS (Buy) suggests policy growth guidance appears conservative considering recent momentum. New policyholders have picked up in number, claims inflation rose in the second half but remains well below the CPI, and ancillary activities are also contributing to growth. Macquarie (Buy) notes relative to system growth, Medibank is winning market share. Health Insurance premium revenue is seen as disappointing, but probably related to deferred premium price increases.

MP1 - Megaport	BEAT	0	0	2/2/0	12.11	10.88	4

Scentre Group reported first half funds from operations 18% above the same period last year, and well ahead of forecasts due to lower rental assistance and higher net property income. While finance costs were also below estimates these are expected to increase meaningfully in the second half. Full year guidance, despite being upgraded thanks to CPI-linked rents, implies a softer second half is ahead. Macquarie (Hold) suggests guidance could be reflective of some conservatism, while Credit Suisse downgrades to Hold believing investor sentiment is likely to hinder a further meaningful recovery in the share price. **BEAT** 3 SEK - Seek 0 5/0/1 31.87 30.22 While Seek's FY22 result was in line on a net basis, FY23 guidance was much higher than anticipated. Management's frank discussion regarding the outlook, which incorporated "classic cost creation" in terms of investment for a long-term opportunity, encountered a surprising amount of criticism. Future performance will rely on execution. The business is highly cyclical, but Morgan Stanley (Buy) highlights a continuation of the current, uniquely tight Australian labour market, which also informs three upgrades to Buy. Macquarie (Sell) believes guidance to be ambitious, expecting a mild recession next year. **MISS** SSM - Service Stream 1/1/0 2 Service Stream's revenue and underlying earnings were in line with Macquarie's expectations but net profit was a miss. Both profit and earnings missed Ord Minnett, as did the dividend. Apart from impacts from a profit provision on one construction project and pressure on metering service margins, Ord Minnett (Buy) believes the base business performance was healthy. Within the Telco segment, margins were higher and synergies were accrued from the Lendlease services acquisition. Macquarie (Hold) expects revenue and profit growth in the coming year. IN LINE SVW - Seven Group 24.94 23.48 4 Seven Group's FY22 earnings rose 25%, in line with forecasts and meeting guidance for 8-10% growth. Strong performances from WesTrac and Coates offset Boral, which faced weather and energy headwinds. All of WesTrac, Coates, Beach Energy and Seven West Media increased margins over the period. The results highlight resilient businesses containing privileged assets, Macquarie notes, with the ability to manage inflationary and other operational or macro pressures. The level of debt is likely to be a concern for some investors, but Credit Suisse believes strong cash generation in WesTrac and Coates makes management's intention to bring debt down achievable. SWM - Seven West Media 5 2/2/10.71 0.71 Seven West Media's result nets out to a mild beat. One likely reason for lower cash receipts is more onerous contract provisions, though questions also remain on the severity of TV ad market softness and the cost outlook. FY23 commentary was mixed as management signalled total TV advertising in the first quarter is down -7% year-on-year while second quarter bookings are currently signalling growth. Management is targeting 39% total TV revenue share in FY23, and while this should be supported by regional markets, Credit Suisse (Buy) suspects replicating FY22 numbers may be difficult without the benefit of the Olympics. Ord Minnett downgrades to Hold. 0 SGF - SG Fleet 2/0/03.19 3.15 2 A beat and a miss for SG Fleet from two brokers nets out to in line. A constrained supply environment saw the company's Corporate Fleet pipeline increase 11.7% in FY22, and the Novated Lease pipeline increase 15.4%, and management expects limited change to this environment in the coming year, and is also anticipating a permanent increase to used car pricing given current supply, price and cost trends. IN LINE SSG - Shaver Shop 0 1/0/0 1.30 1.30 Shaver Shop's FY22 result was in line with Ord Minnett's forecast. The broker notes the company has a strong position in the personal care segment and generates high returns on capital. While there remains scope for in-fill stores and expansion in New Zealand, the company has largely built out its network in Australia. Ord Minnett expects complementary adjacent business is likely to feature in expansion plans and create further value for shareholders. SCP - Shopping Centres Australasia Property MISS 1/4/1 Shopping Centres Australasia's FY22 result was in line but FY23 guidance falls short of forecasts due to rising debt costs. Cash collection is now more than 100% and covid is having little impact, with negligible net rent relief provided in the year. Citi (Buy) considers this a good entry point for a defensive earnings stream with a medium term growth profile, which is trading at net tangible asset value and offering a 5.5% yield. Ord Minnett (Lighten) believes there's better value elsewhere in the sector. IN LINE SGM - Sims 0 2/2/017.78 16.48 Sims reported in line with guidance and forecasts, and the dividend surprised to the upside. While the company benefited from higher metal scrap prices in FY22, management pointed to a fall in the non ferrous prices to US\$320-US\$400/t at the start of FY23 from around US\$700/t in March. No FY23 guidance was forthcoming, with management providing a cautious outlook given uncertainty around falling prices and slowing economies as rapid rate rises impact on demand. There is some consensus among brokers that scrap prices may have bottomed nonetheless. **MISS** SDR - SiteMinder Siteminder posted a slight miss on earnings due to higher operating costs, but featured accelerating revenue momentum in the June quarter. On a mix of higher assumed transaction average revenue per user (APRU) growth, lower subscriber ARPU growth and higher costs, Ord Minnett lowers its forecasts, but materially stronger long-term earnings than pre-covid are expected. IN LINE 0 1 SOM - SomnoMed 1/0/0 1.91 1.88 There were no significant surprises for Morgans in SomnoMed's FY22 earnings report with sales up 16%, in line with expectations and earnings margins a solid 70%. The company is on track for the global launch of Rest Assure in FY23 and the strategy of investing for growth at the expense of

underlying profitability remains intact. Uncertainty around the success of Rest Assure remains, but success would extend SomnoMed's leading market

Vicinity Centres' FY22 results were ahead of estimates, mainly because of a release of covid-related provisions in the second half. Retail conditions are strong and there is positive momentum across sales and leasing activity. While FY23 growth guidance of 10-15% is considered strong, the key going forward will be continued execution on mixed-use developments. Morgan Stanley (Sell) claims guidance excluding provision reversals is an implicit admission the FY22 result was an inflated number. Macquarie downgrades to Hold, coming into line with others who find valuation fair.										
VVA - Viva Leisure	IN LINE	0	1	0/1/0	2.47	1.39	1			
Viva Leisure reported FY22 revenues below Citi's forecast but losses broadly in-line. Citi notes a higher utilisation rate of 69% for owned locations as well as growth in membership, while also noting a negative 12-month push-back in the 400 location target. The broker expects a slower-than-forecast rollout of locations and a weaker consumer backdrop. Concerns around the capital intensity to fund growth with a new scrip option for acquisitions, as well as the cost of living headwinds, are highlighted as reasons contributing to the broker's downgrade to Hold.										
VSL - Vulcan Steel	BEAT	0	0	1/1/0	9.40	8.85	2			
Vulcan Steel delivered a small second half beat to UBS's (Buy) expectations, driven by steel product price inflation, while cash flow was lower than anticipated given higher than expected inventory. The broker notes with hot rolled coil prices starting to decline, inventory could shift from a tailwind to a headwind over the coming year, but anticipates higher long-run stainless steel pricing, alongside acquisitions, should soften the decline. Credit Suisse (Hold) notes the result was well ahead of prospectus.										
WGN - Wagners Holding Co	MISS	0	1	1/2/0	1.58	1.18	3			
Wagners' underlying earnings fell short of Morgans (Hold) and Macquarie (downgrade to Hold). Construction Material Services margins were weaker than expected, as the company was unable to secure sufficient price improvement fast enough to counter sharp cost increases. New Generation Building Materials sales were better than expected, with Composite Fibre Technologies revenues rising 32%. Increased production capacity in A&NZ and a new facility in Texas set this division up for growth ahead. Management expects improving market conditions and ongoing growth for both cement and concrete volumes through FY23. Credit Suisse expects margins to be flat.

West African Resources' first half net profit came in -10% below Macquarie's expectations, on higher D&A and tax. A change in inventory did drive a slight beat to operating earnings, and net cash was in line. The broker sees Sanbrado as providing a solid base from which to develop Kiaka, with the project set to support the miner's aspiration of producing more than 400,000 ounces by 2025.

WTC - WiseTech Global | BEAT | 0 | 1 | 2/1/1 | 47.21 | 55.75 | 4

While WiseTech Global's FY22 result was in line, FY23 guidance was mostly better than expected. The big news is WiseTech has signed UPS as a global rollout customer, which Macquarie (Sell) sees as a "solid win". But while the outlook remains positive, Macquarie believes margin expansion has now largely played out, notes revenue growth is moderating, while pointing out the stock is trading at 74x forward earnings. Ord Minnett downgrades to Accumulate from Buy on valuation. However, the financial and strategic value of the core CargoWise software platform is rising sharply, Morgan Stanley (Buy) observes, as customers navigate an increasingly complex global supply chain.

 WOR - Worley
 BEAT
 0
 0
 4/0/1
 13.73
 15.33
 5

Worley delivered 18% underlying earnings growth in FY22, with second half earnings up 16% on the previous comparable period. Revenue growth was below forecasts, the difference being higher margins. Margins are expected to be maintained throughout FY23. The outlook remains positive but being revenue-driven, performance relies on further contract wins. Citi (Buy) envisages geopolitical tensions in Europe are an opportunity for growth, with the shift towards energy security driving re-gas projects. As revenue growth is slower than expected, Ord Minnett (Lighten) envisages, in contrast, potential downgrades to consensus estimates for FY23.
