Latest

Company	Result	Upgrades	Downgrades	Buy/Hold/Sell	Prev Target	New Target	Brokers
COF - Centuria Office Reit	IN LINE	0	0	1/1/1	2.13	2.10	3
While Centuria Office REIT's result appeared a beat at the headline, several one-off items flattered the funds from operations number. Full year guidance implies lower funds from operations in the second half, likely reflecting vacant leasing space. Despite a full split of ratings, all brokers highlight vacancies as an issue. Morgan Stanley's (Sell) key concern is the REIT's occupancy levels which have dropped to 91%. The broker expects the vacant floors to take around twelve months to lease up, putting downward pressure on funds from operations for the next two years.							
JHG - Janus Henderson Group	BEAT	0	0	2/1/0	41.10	47.87	3
Janus Henderson's December quarter result smashed forecasts. Performance fees were well ahead of expectations, fund flows and market gains were stronger, plus costs were well controlled. Asset under management growth was nevertheless net of movements both in and out of different funds and regions, and costs are expected to rise from here on investment and currency movement. Dai-ichi has decided to remain a product partner and will sell its near 17% stake in the group. The result should mean a good price, but also a potential overhang on the stock.							
NCK - Nick Scali	BEAT	0	0	2/0/0	10.43	11.58	2
A very strong first half for Nick Scali saw profit rise 100%. A highlight for Macquarie is strong written orders will be recognised in 2021. Also, the gross margin increased to 64%, and while reduced marketing spend may not be maintained, a foreign exchange tailwind and efficiency gains will be. Citi suggests the company will continue to benefit through 2021 on consumers staying at home with limited spending options given travel restrictions. FY22 will be cycling a covid-driven FY21, but the market has taken this into account. On extended international travel restrictions, HomeBuilder, high savings rates and currency tailwinds, FY22 risk is still considered to the upside. The company is also assessing multiple M&A opportunities.							

Previous Corporate Results Updates

Company	Result	Upgrades	Downgrades	Buy/Hold/Sell	Prev Target	New Target	Brokers
AMC - Amcor	BEAT	1	0	5/2/0	16.96	17.00	7
Amcor's 16% first half earnings growth beat consensus despite a slightly weak result in flexibles. FY21 guidance was again upgraded, to 10-14% earnings growth from a prior 7-12%, and a \$200m increase to the company's buyback program was announced. Bemis synergies continue to track well and the raw material outlook is considered relatively benign. Synergies will eventually fade but the company remains in the hunt for other opportunities. Retail demand is likely to soften from elevated levels but healthcare should pick up the slack. Brokers agree Amcor is a quality defensive. UBS upgrades to Buy.							
BWP - BWP Trust	MISS	0	0	0/1/3	3.65	3.65	4
BWP Trust's first half income missed forecasts slightly due to rent relief offered in the period. Guidance to flat FY21 dividend growth is maintained. A 5% rise in net tangible asset value was overshadowed by the first ever fall in rent reviews (-14%) and the lowest income growth ever of 2.0%. While Bunnings and other tenants have performed well through the pandemic, 13 rent reviews are pending and 7 assets are vacant. The REIT has 19 market rent reviews to complete in the rest of the financial year including 6 that remain unresolved from FY20. UBS (Sell) notes BWP Trust is priced as a defensive stock despite elevated risks.							
CIP - Centuria Industrial Reit	IN LINE	0	0	2/2/0	3.47	3.46	5
Centuria Industrial REIT's -11% fall in funds from operations broadly met expectations. FFO guidance has been upgraded to at least 17.6c from 17.5c driven by acquisitions in the second half and a lower cost of debt. A highlight for UBS (Buy) was the leasing renewal success in NSW at Warnervale, tenanted by Woolworths and Visy, significantly de-risking expiries out to FY22. More upside could come, suggests Credit Suisse (Hold), from favourable leasing outcomes at upcoming vacancies and less than expected covid provisions. Capital growth to remain strong for industrial assets.							
CCP - Credit Corp	BEAT	0	0	1/2/0	26.53	33.45	3
Credit Corp's forecast-beating result highlighted to Macquarie (Buy) the company's competitive position in the A&NZ debt purchasing market and potential in the consumer lending segment, as well as potential in US debt purchases. Ord Minnett (Hold) believes the acquisition of Collection House's debt ledger at the end of December was "impeccably timed" given the lack of supply in the market and a consumer lending business that is only now seeing volumes re-emerge. Morgans (Hold) sees earnings being led by the US opportunity. Management upgraded all guidance metrics and expects lending revenue and profit to return to growth in the second half. Hold ratings reflect valuation.							
HRL - Hrl Holdings	BEAT	0	0	1/0/0	0.16	0.16	1
HRL Holdings delivered first half revenue of \$16.4m and underlying earnings of \$3.5m, slightly ahead of Morgans' forecast. Analytica's earnings performance (up 14%), and the attainment of a net cash position, were key highlights for the broker. Morgans has increased the Geotech division's earnings estimates, which have been offset by moderating forecasts for the Analytica and Software segments.							
IGO - IGO	BEAT	0	1	1/3/0	5.38	6.54	4
A strong December quarter, which saw Tropicana beat on production and Nova on costs, led IGO to an overall beat with its first half result. Nova (nickel) provided 70% of earnings. With the planned divestment of Tropicana and acquisition of Greenbushes (lithium) brokers see the stock as ideal for those wishing to investment in the EV/battery theme. The problem is the market is already onto it, leading brokers to declare the valuation full and Credit Suisse to pull back to Hold to join the pack.							
PNI - Pinnacle Investment	BEAT	0	0	3/0/0	7.25	9.36	3

Pinnacle Investments' result didn't just beat, it left broker forecasts in the dust. Profit was up 120% year on year due to a significant increase in performance fees. Share of affiliates' net profit was up 80%, and base fee margins also surpassed expectations. Macquarie echoes consensus in suggesting the fund manager has delivered on its earnings potential and the diversified nature of affiliates and the quality of the performance will support an upgrade cycle from here.

PSI - Psc Insurance	IN LINE	0	0	1/0/0	3.60	3.60	1
----------------------------	----------------	---	---	-------	------	------	---

PSC Insurance has pre-released first half results, noting \$28.7m in operating earnings, and reiterated FY21 operating earnings guidance at the top end of the \$65-70m range. Organic growth continues across both Australia and the UK and acquisitions remain in focus, which Macquarie assesses represent upside risk to earnings forecasts.

RMD - Resmed	BEAT	0	0	3/3/1	28.09	28.08	7
---------------------	-------------	---	---	-------	-------	-------	---

ResMed's December quarter result beat all forecasts. The global resurgence of the virus did not impact on the base business (sleep) as much as feared. On the other hand, ventilator sales continued. The company will now cycle strong ventilator sales from the first wave, which will appear a headwind, but brokers are pleased how well the base business has recovered and note re-supply of masks and accessories will drive revenues. New investment in cloud-based home healthcare should provide for a positive outlook. The split of broker ratings reflects differing views on cycling ventilator sales and base business restrictions as the virus rages on.

TPW - Temple & Webster	MISS	0	0	0/1/0	10.60	10.90	1
-----------------------------------	-------------	---	---	-------	-------	-------	---

Temple & Webster's first half revenue and earnings were slightly lower than Macquarie estimated. The result is nevertheless considered strong, with revenue benefiting from broader consumer trends and increasing online penetration. The broker sees a long-term opportunity driven by category expansion, customers moving online and investment. Revenue growth is expected to taper off as 2021 progresses, although operating leverage continues to fund new initiatives.
