Latest							
Company	Result	Upgrades	Downgrades	Buy/Hold/Sell	Prev Target	New Target	Brokers
LEP - ALE Property	IN LINE	0	0	0/1/1	4.51	4.64	2
<p>ALE Property's earnings and dividend largely met expectations. Following a rent review, the REIT has divested of six properties with two more up for sale. The portfolio is now -36% under-rented, but Macquarie (Hold) suggests the divested properties would have seen rent reductions so offloading them actually improves portfolio quality. Ord Minnett (Lighten) considers the portfolio high-quality and stable and it should benefit from demand for long WALE assets, but sees the critical issue is the level of under-renting.</p>							
BWP - BWP Trust	IN LINE	0	0	0/1/3	3.65	3.65	4
<p>BWP Trust's dividend was in line with recent guidance. However, the dividend is still not fully covered by funds from operations but partially from capital profits, and the same will be true in FY22. Occupancy is 97.8% but this will remain under pressure as lease expiries average 10% per year for the next five years. Bunnings remains a solid prime tenant in the current climate but intends to vacate two sites per year. Until the trust can fully cover its dividends, brokers do not see upside for the stock, suggesting acquisitions are required to drive earnings.</p>							
CIP - Centuria Industrial REIT	IN LINE	0	1	3/2/0	3.77	3.94	5
<p>Industrial is the one REIT segment actually benefiting from covid and Centuria Industrial has had a good share price run as a result, leading Ord Minnett to pull back to Accumulate from Buy despite an in-line result. FY22 guidance was a little underwhelming but the REIT has a history of upgrading guidance throughout the year on the back of acquisitions. FY22 is shaping up as another acquisitive year. Net tangible asset valuation rose during the period and the REIT has plenty of balance sheet firepower, but the market is now rather competitive.</p>							
COF - Centuria Office REIT	MISS	0	0	1/2/1	2.25	2.48	4
<p>Centuria Office REIT's result was in line with all forecasts yet brokers are polarised on their views. Given the FY21 result included a one-off lease surrender payment from Foxtel and the sale of an asset, and that FY22 guidance is short of expectation (albeit likely conservative), realistically this is a miss. Morgan Stanley (Buy) stands out in being positive on the office market despite fresh lockdowns while UBS (Sell) goes the other way. Upside is possible from successful management of current vacancies and upcoming lease expiries.</p>							

CCP - Credit Corp	IN LINE	0	0	3/0/0	33.25	32.95	3
<p>Credit Corp's result was largely in line, and although FY22 guidance underwhelmed, brokers suggests this is conservative. The net impact is a net lower target but three Buy ratings have been retained. Increased profit was driven mostly by the US business. While the purchased debt ledger market in A&NZ remains subdued, the US outlook is building. The local purchase of Collection House's book nonetheless helped. The company retains plenty of liquidity to provide for market share gains when the market picks back up again.</p>							
GUD - G.U.D. Holdings	IN LINE	0	0	2/2/0	13.57	12.95	4
<p>Strength in the automotive sector since last year's lockdowns is ongoing, but cost increases in the second half pressured margins. GUD Holdings' earnings result was in line with expectations but management has not provided guidance, given further lockdown uncertainty. Macquarie (Buy) notes automotive aftermarket trade is defensive and should recover quickly as mobility normalises. Credit Suisse (Buy) sees cost pressures as transitory although freight will take time to normalise. There's not a lot of immediate upside potential, unless the company can continue to pursue acquisitions.</p>							
GMA - Genworth Mortgage Insurance Australia	BEAT	0	0	1/0/0	3.35	3.40	1
<p>Genworth Mortgage Insurance Australia's first half results were substantially ahead of Macquarie's forecasts, and included exceptionally low claims as the moratorium on foreclosures continued. Dividends have resumed based upon a more favourable economic outlook. The broker suspects investors will be cautious for the next few months until there is clarity on the outcome of the Commonwealth Bank tender. Still, Macquarie believes the stock is undervalued and maintains an Outperform rating.</p>							
JHG - Janus Henderson	BEAT	0	1	1/3/0	48.85	58.45	4
<p>Janus Henderson comfortably beat earnings forecasts in its quarterly result, largely due to better than expected performance fees. Equity investments were a drag during the quarter but multi-asset and alternatives provided a positive offset. Assets under management valuation grew along with markets, and while funds outflows continued, the pace has slowed. Three brokers remain cautious going forward, particularly with regard equities, but Macquarie (Buy) suggests earnings upgrades provide scope for further PE multiple upside.</p>							
NCK - Nick Scali	BEAT	0	0	2/0/0	11.58	13.40	2
<p>If expectations for a slow-down in furniture demand post the surge in last year's lockdowns was set to be a drag, Nick Scali's FY21 result didn't show it, beating both broker forecasts and guidance. A slow-down from lofty heights is still expected, but Macquarie notes FY22 (July) trading is encouraging, store roll-outs provide momentum and the company's appetite for M&A has the potential to add value. New lockdowns locally and production challenges in Vietnam and Malaysia are headwinds, Citi notes, but as border closures persist, Macquarie predicts domestic spending towards the furniture category will likely remain supported.</p>							
URW - Unibail-Rodamco-Westfield	IN LINE	0	0	0/0/2	4.70	3.70	2
<p>Brokers saw a mixed result from UR Westfield, impacted by global lockdowns in the first half. The issue going forward is one of uncertainty, with the mall owner failing to provide FY guidance. A recovery is in its early stages, and the main risk comes from increasing vacancies in US malls, rising cost of debt, and a majority of leases being short-term. Ord Minnett would like to see progress on balance sheet deleveraging, while Citi simply points to too much uncertainty, both retaining Sell ratings.</p>							

Previous Corporate Results Updates

Company	Result	Upgrades	Downgrades	Buy/Hold/Sell	Prev Target	New Target	Brokers
CIA - Champion Iron	BEAT	0	0	1/1/0	8.50	8.58	2

Champion Iron's first quarter earnings comfortably beat forecasts on strong provisional iron ore pricing gains, offsetting higher costs due to spending on the ongoing Bloom Lake 2 expansion. Macquarie (Buy) expects elevated iron ore prices to continue to drive momentum, and significantly increases earnings forecasts. With the phase 2 expansion on track, Citi (Hold) believes first dividends could be paid in FY22.

CIM - Cimic Group	BEAT	1	0	2/1/0	23.91	24.90	4
--------------------------	-------------	---	---	-------	-------	-------	---

Cimic Group's first half result highlighted a swift bounce-back from pandemic-led restrictions last year. Work in hand increased 10%, while growth was driven by a 20% increase in infrastructure construction as project awards returned. Momentum should continue into the second half, albeit Sydney's construction restrictions in lockdown will provide some drag. Pandemic effects are also still an issue in Asia. Credit Suisse upgrades to Buy. Macquarie is on restriction.

FDV - Frontier Digital Ventures	IN LINE	0	0	1/0/0	1.61	1.65	1
--	----------------	---	---	-------	------	------	---

At an aggregate level, Frontier Digital Ventures' result was in-line with Morgans' estimates, and showed a strong rebound in most businesses. The broker has made minor changes to forecasts. Like-for-like pro forma revenue growth of 46% on the first half (86% including acquisitions) is more impressive, taking into account the around -10-30% negative FX impact across the portfolio, Morgans suggests.

RIO - Rio Tinto	BEAT	0	0	4/2/1	135.43	134.71	7
------------------------	-------------	---	---	-------	--------	--------	---

Rio Tinto's actual earnings result ranged from a slight beat to a slight miss of forecasts. But that's not what anyone cared about. All anticipation was around the dividend, and Rio more than delivered, thus implying a beat. Looking forward, a split in broker ratings largely reflects iron ore price forecasts. Macquarie (Buy) expects ongoing momentum while UBS (Sell) suggests supply is set to increase and demand decrease. There is also some uncertainty around capacity expansion plans, and a closure of Richards Bay remains a risk.

TPW - Temple & Webster	BEAT	0	0	2/1/0	12.86	14.41	3
-----------------------------------	-------------	---	---	-------	-------	-------	---

Temple & Webster's result confirmed the company's investment in marketing is paying off handsomely and market share has been gained. Revenue growth is continuing to accelerate, despite cycling last year's online shopping spree. New lockdowns have boosted July sales, but ongoing investment in brand awareness and expected further market share gains underpin two Buy ratings. Macquarie (Hold) is a little more circumspect, believing the market now accepts a growth carry-through from last year so the longer term outlook is more critical.
